

Why use personal tax return software?

Thousands of firms use Digita Personal Tax software to prepare core compliance forms for self-assessment. Easily submit your clients' tax returns to HMRC and never miss a deadline.

On top of this, we offer value-added services with intelligent tools, which keep your data consistent and identify potential savings for your clients. Cut your data entry time, reduce manual errors and manage risk across your entire practice with our best-selling module.

Built-in trackers

Save time with automated trackers which summarise the progress of your work.

Budget summary report

Send your clients an automated personalised report within hours of the Budget.

Scenario planning

Offer proactive tax advice by showing your client a 'what-if' situation on screen.

Clever alerts

Highlight simple errors and identify further fee opportunities using TaxAware.

Data accuracy

Easily compare your client data across the years and create custom reports.

Dividend information

Access the top 100 dividends as standard with the option to buy a comprehensive data feed of UK equity and Unit Trust payments.
