Communicate directly with your clients

Obtain timely information and documentation from your clients as part of your workflow.

- See comments in real time to easily track the discussion for any request.
- Simply drag and drop documents to upload.
- Upload sample documents to show how a request should be completed.
- Protect sensitive information with the option to password-protect the microsite.

Integration with Confirmation

With Confirmation within Cloud Audit Suite, confirmations are more efficient, providing a more comprehensive view of the client’s relationships with financial institutions and supporting new forms of confirmation that might arise as financial relationships and auditing practices evolve.
