

ONESOURCE Global Trade Visibility

By leveraging a global trade network of supply chain partners and government agencies, the ONESOURCE® Global Trade Visibility (GTV) solution delivers cloud-based analytics to create a trade compliance driven supply chain.

The challenge

Managing import and export operations for a global company has its challenges, especially when it comes to data. For most companies, trade data resides in disparate internal systems, with various government agencies, and across multiple customs brokers and freight forwarders. With limited visibility, companies are forced to make decisions with information that is outdated, inconsistent, and incomplete.

The result is that organisations are unable to answer critical operational questions such as — what is my global duty spend, how are my brokers performing, what free trade agreements are available, what are my areas of risk, how can I lower landed cost, and is my trade data accurate and complete?

The solution

The ONESOURCE GTV solution was developed for today's trade compliance professional. Trade executives, who need real-time visibility into their import and export activity, are now able to analyse trade data to mitigate risk, reduce cost, and increase compliance.

Other solutions on the market are not designed for analysing trade compliance. They are static in nature and resource-intensive to get up and running. GTV, on the other hand, comes integrated to the network where your data lives and provides out-of-the-box reports and dashboards targeted at gaining insight into trade compliance activities. With GTV, you can begin analysing data in weeks, not months, leading to a faster time to value.

The benefits

GTV provides an advanced analytics platform that businesses can use for continuous improvement while staying ahead of an ever-changing regulatory landscape. With GTV, your trade data is continually updated, allowing you to make more informed decisions, measure and manage key performance indicators, identify savings opportunities, and lower the risk of non-compliance with customs regulations.

You worry about analysing your data — we take care of the rest.

Feature	Activity
Visibility across trade lanes	Create a harmonised, unified view of trade activity across all trade lanes
Global network integration	Integrate with our global network of government agencies, brokers, and freight forwarders
Pre-built reports	Access 1,000+ out-of-the-box reports built to analyse trade data
Drill-down capabilities	Use intuitive filters to drill down to the product number level
Dynamic scorecards	Use dynamic scorecards to evaluate the health of trade compliance operations
Streamline setup	Dramatically reduce setup times without involvement from IT
Real-time trade data	Leverage trade data that is continually updated rather than a static, one-time report
Strategic decision making	Base sourcing decisions on available free trade agreements and duty deferral programs
Minimise risk	Identify compliance discrepancies to minimise risk from enforcement action
Robust content	Leverage integrated trade content for 210+ countries and territories
Integration possibilities	Manage analysis to post-declaration review by integrating other Thomson Reuters® solutions

Thrive globally. Compete confidently with ONESOURCE Global Trade solutions.
